Recommendation

Demography	<div>Customer Demographics</div> <ul style="list-style-type: none"> • Mumbai has the highest number of customers, followed by Chennai. • The majority of customers are salaried IT employees. • Most customers fall within the 25-35 and 35-45 age groups.
Utilization	<div>Income Utilization Trends</div> <ul style="list-style-type: none"> • The 35-45 age group has the highest income utilization, while customers 45+ have the least. • Mumbai has the highest income utilization, whereas Chennai has the lowest. • Salaried IT employees utilize the most of their income, while government employees have the lowest utilization rate.
Expenditure	<div>Spending Behavior</div> <ul style="list-style-type: none"> • The top spending categories include bills, electronics, groceries, health, and travel. • Customers in the 21-25 age group spend the most on food, entertainment, and apparel. <div>Payment Preferences & Credit Card Usage</div>
Credit card usage	<div>Age-Based Payment Preferences</div> <ul style="list-style-type: none"> • UPI is the preferred payment mode for customers aged 21-25. • Customers in other age groups prefer credit cards over UPI.
Insights	<div>Occupation-Based Payment Preferences</div> <ul style="list-style-type: none"> • Salaried IT and other salaried employees prefer credit cards. • Freelancers lean towards UPI over credit cards. • Interestingly, despite having the least income utilization, government employees have the highest credit card usage percentage.
Recommendation	<div>Category-Based Credit Card Usage</div> <ul style="list-style-type: none"> • Credit cards are the least preferred for food and grocery purchases, indicating that customers might prefer cash, UPI, or debit cards for these everyday expenses.

Age-Based Offers & Incentives

21-24 Age Group

- Focus on youth-centric deals in entertainment, food, and apparel.
- Since this group prefers UPI over credit cards, promote mobile wallets, contactless payments, and UPI-linked discounts to enhance convenience.

24-34 Age Group

- Offer targeted deals on electronics, travel, and entertainment to align with their spending habits.
- Introduce higher rewards on bills, groceries, electronics, and health in major cities like Mumbai, where spending is the highest.

Credit & Rewards Optimization

Increase Credit Limits for Salaried IT Professionals

- Given their high income utilization, offering higher credit limits can improve financial flexibility and encourage greater engagement.

Family-Centric Rewards for Couples

- Introduce tailored family-focused rewards on groceries, utility bills, and household essentials, catering to customers in the 35+ age group who prioritize family spending.

Enhanced Cashback & Reward Systems

- Boost credit card rewards on top spending categories like bills, groceries, electronics, and healthcare, especially in high-spending cities like Mumbai.

Payment Strategy Enhancement

Strengthen UPI & Digital Payment Benefits for Younger Customers

- Since 21-24-year-olds prefer UPI, enhance UPI-linked cashback, QR code payments, and wallet-based incentives to cater to their digital-first habits.

Encourage Credit Card Usage in Non-Traditional Categories

- Since credit card usage is lower in food & grocery purchases, introduce special discounts and cashback on these transactions to drive adoption.
